Quadra Magnifier

MAGNIFYING LAMP

Quadra Magnifier has an extra wide, 3 diopter (1.75X), rectangular glass lens, providing a superb panoramic view. High power 6,000°K daylight LEDs on both sides of the lens give shadow-free magnification. Each side can be independently turned on or off to give 3D viewing. Heavy duty internal spring arm allows accurate and consistent positioning and an auto power off function saves energy. An optional 12D (4.0X) swing arm lens and additional 4D (2.0X) / 6D (2.5X) suction lenses are available separately.
